

PROVIDING ACCESS TO A SERVICE USING A SERVICE ENGINE

ABSTRACT OF THE DISCLOSURE

Providing access to a service includes providing a subset of a directory of services associated with third party vendors to a portal communicating with a user system. A service comprises use of a software application. A selection of selected services is received from the user system. The selected services have conditions governing access to the selected services. A user identifier is received and linked with the selected services. The user identifier is allowed access to the selected services according to the one or more conditions.
